Notice of Allowability

DETAILED ACTION***Response to Amendment***

1. In view of applicant's amendment filed 30 January 2004, all previous rejections are withdrawn.

Allowable Subject Matter

2. Claims 1-13 are allowable over the prior art of record.
3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the claims are the inclusion of the limitations of an apparatus for measuring a volume of a quantity of a liquid wherein at least two electrodes connected to a voltage source and a measuring system for determining an electrical impedance between the electrodes are disposed and incorporated only in the bottom of a chamber that receives the liquid, allowing the electrical impedance of the liquid itself to be determined. The closest reasonable Prior Art reference is WO 98/03841 to Harbaugh, (see Fig.1 below) which teaches an apparatus for determining the height of a liquid (13) wherein a pair of capacitive electrodes (16 and 17) are disposed beneath the body of liquid, allowing the capacitance (18) of the liquid above the electrodes to be determined, and thus the height of the liquid.
